

Merlinus Liberatus.

BEING AN

ALMANACK

For the Year of our Redemption,

1 7 5 9.

Being the third after *Bissextile*, or *Leap-Year*.

And from the Creation of the World, according
to the best History, 5708.

And the 67th of our Deliverance by K. *William*
from Popery, and Arbitrary Government.

But the 63d from the

Horrid, Popish, High-Church, Jacobite Plot.

Wherein is contained all Things fitting and useful for such a Work, as
an Ephemeris of the Daily Motions of the Planets, with their various
Configurations, Aspects, Conjunctions, Lunations, Eclipses, Astrono-
mical, Astrological, Meteorological Observations, the Rising and Setting
of the Sun, Moon, Planets, and fixed Stars, illustrated with Tables of
the Tides, Terms, and Daily Equation of Clocks, Length and Break,
Increase and Decrease, of Days, Semidiurnal and Seminocturnal Arches
for several Latitudes, a Chronology. Remarks on the Divisions of the
Heavens, a Nativity, &c. &c. The like not extant.

To which is prefixed,

The Protestant Remembrancer.

Calculated for the Meridian of *London*,

Whole { Longitude } is { 24 } Degrees { 20 } Minutes.
 { Latitude } { 51 } { 32 }

By JOHN PARTRIDGE.

— *Etiam Mortuus loquitur.*

LONDON: Printed by R. REILY, for the
Company of STATIONERS.

[Price Stitch'd Nine Pence.]

Ephemerides. &c.

The Prologue, or Introduction, is a short Paraphrase
on Part of the 14th Chapter of *Isaiah*.

THE Nations round surpriz'd and overjoy'd,
Shall crowd to see proud *Babylon* destroy'd,
And spreading forth their Hands to Heav'n shall say,
O happy ! happy ! long expected Day !
The imperious City now must cease,
For sending Robbers to disturb our Peace :
Thus says the Lord of Hosts, O *Babylon*,
Ripe for Destruction thou art grown.
In Storms of Fury I'll against thee rise,
Which shall thy careless cruel Sons surprize.
Thy lofty Tow'rs I'll low and level lay,
And sweep thy vile Inhabitants away.
Thy Tow'rs like *Sodom's*, I will make,
And turn thee to a mighty Lake ;
The lonesome Bittern shall possess
This fenny Seat, this reedy Wilderness.
The Waves shall thro' thy Cedar Chambers rowl,
And on thy Shore shall Water-Monsters howl.
The Palaces, where cruel Tyrants reign,
In coming Time shall entertain,
The mute Oppressors of the Main.
Thus *Babylon* shall always be,
The Seat of Blood and Tyranny.
A scaly Garrison shall dwell,
In every Fort and Citadel.
The swift Assassins of the Flood shall sport,
Within thy Monarch's weedy Court ;
Thither shall Fish of every Kind resort :
There thy luxurious Sons they shall devour,
And feed on those, who fed on them before.

The Protestant Remembrancer continued. 1759.

Being an Historical Account of the Horrid Popish, High Church, Jacobite Plot, for murdering King William III. and to procure a French Invasion, discovered in Feb. 1695-6.

NOW because such desperate Designs cannot be concerted in a Day, let us look a little back, and search as far as the hellish Darkness will permit, into the beginning of it. The latter end of 1694, the villainous Assassination of His Majesty was contrived, and the Project was to cut off the King before he went to *Holland*; but by the Blessing of God it took no Effect.

But the restless Spirits of those wicked Men would not let them give over their Villiany, and they had several Meetings about it; the next Year particularly one, at which were two Lords, Sir *J. Freind*, Sir *W. Perkins*, Sir *J. Fenwick*, Mr *Charnock*, Mr *Cook*, Capt. *Porter*, and Mr *Goodman*. Here they all agreed, that for restoring King *James*, a Messenger should be sent to desire him to procure of the French King 1000 Horse, 1000 Dragoons, and 8000 Foot; and that upon their landing they would join them with 2000 Horse. Mr *Charnock* was sent on this Message to France. And that the Murder of King *William* might not lie behind, Application was made to Sir *George Barclay*, a bigotted Papist then in *England*, to procure a Commission from King *James*, who going to *St Germain*s, brought a Commission all written by King *James* himself, to seize King *William*, which Sir *W. Perkins* confessed he saw. Thus the Jacobites being ashamed to set up the late King and themselves under the Title of Murderers, they minced the Matter into softer Terms, and that it was to levy War upon the Prince of *Orange* and all his Adherents; others said it was to attack him in his Winter-Quarters. Some proposed the seizing his Majesty and carrying him alive into *France*, &c. All which were meer Tricks and Evasions; for it appears by M. *de la* *Reine's* Oath, that they all knew the Meaning of it.

To be continued.

A Table of the Moon's Age for every Day throughout the present Year 1759. Whereby, with the Help of the next general Tide-Table, the Time of High Water at all the Places above mentioned in it are shewed by Inspection.

Explanation of this, and the following Table.

Find the Month in the Head of the Table, and the Day in the First Column on the left Hand, and in the Angle of Meeting you have the Day of the Moon's Age, with which enter the following Table, and you'll find the Time of High Water at all the Places above-mentioned, by Inspection.

Example. January the 10th, you'll find the Moon 11 Days old, and over-against 11, in the first Column of the next Table, you'll find in the 2d Column 11 Hours 48 Min. which is the Time of High Water at the Places above-mentioned.

Enter this Column with the Moon's Age, and over-against it you have the Time of High Water at the Places above-mentioned.

[illegible]

Enter this Column with the Moon's Age, and over against it you have the Time of High Water at the Places above

A Table of Terms and Returns, for the Year of our Lord 1759.

Hilary Term begins Jan. 23, ends Feb. 12.

Returns or Essoign Days.		Exc.	Ret.	App.	D. W.
In eight Days of <i>St Hilary</i> ,	<i>Jan. 20</i>	21	22	23	<i>Tuesd.</i>
From the Day of <i>St Hilary</i> in 15 Days,	27	28	29	30	<i>Tuesd.</i>
On the morrow of Purif. of bl. <i>V. Mary</i> ,	<i>Feb. 3</i>	4	5	6	<i>Tuesd.</i>
In eight Days of the Purif. of bl. <i>V. Mary</i> ,	9	10	11	12	<i>Mond.</i>

Easter Term begins May 2, ends May 28.

From the Day of <i>Easter</i> in 15 Days,	<i>April 29</i>	30	31	2	<i>Wedn.</i>
From the Day of <i>Easter</i> in 3 Weeks,	<i>May 6</i>	7	8	9	<i>Wedn.</i>
From the Day of <i>Easter</i> in 1 Month,	13	14	15	16	<i>Wedn.</i>
From the Day of <i>Easter</i> in 5 Weeks,	20	21	22	23	<i>Wedn.</i>
On the morrow of the <i>Ascension</i> ,	25	26	27	28	<i>Mond.</i>

Trinity Term begins June 15, ends July 4.

On the morrow of the holy <i>Trinity</i> ,	<i>June 11</i>	12	13	15	<i>Frid.</i>
In eight Days of the holy <i>Trinity</i> ,	17	18	19	20	<i>Wedn.</i>
From the Day of holy <i>Trinity</i> in 15 Days,	24	25	26	27	<i>Wedn.</i>
From the Day of holy <i>Trinity</i> in 3 Weeks,	<i>July 1</i>	2	3	4	<i>Wedn.</i>

Michaelmas Term begins Nov. 6, ends Nov. 28.

On the morrow of <i>All-Souls</i> ,	<i>Nov. 3</i>	4	5	6	<i>Tuesd.</i>
On the morrow of <i>St Martin</i> ,	12	13	14	15	<i>Thurs.</i>
In eight Days of <i>St Martin</i> ,	18	19	20	21	<i>Wedn.</i>
In 15 Days of <i>St Martin</i> ,	25	26	27	28	<i>Wedn.</i>

N. B. No Sittings in *Westminster-Hall* on *Ascension-Day*,
Midsummer-Day, and the 2d of *February*.

The *Exchequer* opens eight Days before any Term begins,
except *Trinity*, before which it opens but four Days.

Note, That the first and last Days of every Term, are the
first and last Days of Appearance.

Two Lawyers when a knotty Cause was o'er,
Shook Hands, altho' they wrangled hard before:
Nouns, says the Client that was cast, pray how
Can you be Friends, who were such Foes just now?
You Fool, crys one, we Lawyers tho' so keen,
Like Shears near cut ourselves, but what's between.

January hath XXXI Days.

Creation, a Philosophical Poem.

No more of Courts, of Triumphs, or of Arms;
 No more of Valour's Force or Beauty's Charms;
 The Themes of vulgar Lays, with just Disdain,
 I leave unsung, the Flocks, the am'rous Swain,
 The Pleasures of the Land, and Terrors of the Main.

February hath XXVIII Days.

How abject, how inglorious, 'tis to lie
Groveling in Dust and Darkñess, when on high,
Empires immense and rolling Worlds of Light,
To range their heav'nly Scenes the Muse invite?
I meditate to soar above the Skies;
To Heights unknown, thro' Ways untry'd to rise:

March hath XXXI Days.

I would th' Eternal from his Works assert,
And sing the Wonders of creating Art.
While I this unexampled Task essay,
Pass awful Gulphs, and beat my painful Way,
Celestial Dove, divine Assistance bring.
Sustain me on thy strong extended Wing;

M	h	u
D	h	u

April hath XXX Days.

That I may reach th' Almighty's sacred Throne,
And make his causeless Pow'r the Cause of all Things known,
Thou dost the full Extent of Nature see,
And the wide Realms of vast Immensity :
Eternal Wisdom thou dost comprehend,
Rise to her Heights, and to her Depths descend :

The Configurations of the Celestial Bodies this Month are moderately Calm, and tend rather to Peace than Discord. The Sun salutes Jupiter by a Trine on his Stationary Point rise to Retrogration; Mercury also meets the Sun by Regressive Motion; and Jupiters Trine upon his place of Direction: So whatever some may expect from these friendly Configurations, I judge the amicable proceedings will be all frustrated.

The 24th of this Month, 1750, was born Pr. Fred. H. 5th Son to the Royal Highness the Prince of Wales.

June hath XXX Days.

Order from Thee, from Thee Distinction came,
And all the Beauties of the wond'rous Frame;
Hence stamp't on Nature, we Perfection find,
Fair as the Idea in th' Eternal Mind.
See thro' this vast extended Theatre
Of Skill Divine what shining Marks appear:

July hath XXXI Days;

Creating Pow'r is all around exprest,
 The God discover'd, and his Care confest.
 Nature's high Birth, her Heav'nly Beauties show,
 By ev'ry Feature, we the Parent know.
 The expended Spheres, amazing to the Sight,
 Magnificent with Stars, and Globes of Light.

August hath XXXI Days.

The glorious Orbs, which Heav'n's bright Host compose
Th' imprison'd Sea, that restless ebbs and flows;
The fluctuating Fields of liquid Air,
With all the curious Meteors hov'ring there;
And the wide Regions of the Land, proclaim,
The Pow'r Divine, that rais'd the mighty Frame.

September hath XXX Days.

What Things soe'er are to an End referr'd,
And in their Motions still that End regard,
Always the fifth is of the Means respect,
These as conducive chuse, and those reject,
Must by a Judgment foreign and unknown
Be guided to their End, or by their own.

Observations.

On the 2d, 3d,
 4th and 5th Days
 this Month Old
 Moon, or the 13th,
 14th, 15th, & 16th
 according to the
 New, 1766, was
 the glorious City
 of London burnt by
 the vile Intendi-
 ngs the Papists:
 before for the
 Remembrance of
 that Memorable
 Year of our Lord,
 the engraven in in-
 delible Characters
 on the hearts of
 posterity, to make
 them shudder and
 detest Popery, and
 all such vile Ince-
 ndibles. Let it re-
 main a Monument
 of Gratitude to
 God, of Caution to
 England, and Pro-
 vidents in general,
 and a Shame to
 Rome.

October hath XXXI Days

For to design an End, and to pursue
That End by Means, and have it still in View,
Demands a Conscious, Wise, Reflecting Cause,
Which freely moves, and acts by Reason's Laws;
That can deliberate Means elect, and find
Their due Connection with the End design'd.

Lunar Aspects						Clock	Moon		Observations.
☉	☿	♊	♈	♊	♋	tooflow	South	sets	
1	Δ		8	□	—	10 36	8 A 7	Morn.	This Month we have an Appearance of friendly Overtures between some Countries, many Treaties carried on, and Ambassadors are much employed about this Time. The Configurations of the heavenly Bodies promise more Friendship and Amity than in some preceding Months but I fear the Ferment of Europe is too great to be appeased for the good of Mankind. The 22d of this Month 1727, His present Majesty was crowned King of Gr. Britain, &c. whom God long preserve, for the honour and safety of these Kingdoms from Popery.

Observations.

The 2d day of this
 Month, 1709, was
 born the illustrious
 Prince of Wales, now
 Prince of Orange.
 The 7th day of
 this Month, 1745,
 Prince of Wales, Pres-
 ent, son of her
 Royal Highness
 the Prin. Deuoger
 of Wales, was born.
 On the 10th day
 of this Month, 1683,
 His Sacred Majesty
 George II. King
 of England, &c.
 was born.
 The 24th day of
 this Month, 1743,
 was born the hope-
 ful Prince William
 Henry, 4th Son of
 her Royal High-
 ness the Princess
 Deuoger of Wales.
 And on the 30th,
 1710, was born her
 Roy Highness the Pri-
 Deuoger of Wales.

December hath XXXI Days.

Whose perfect Wisdom, and whose prudent Care,
With one Confed'rate Voice, unnumber'd Worlds de-
See how the Earth has gain'd that very Place, [clare.
Which of all others in the boundless Space
Is most convenient, and will best conduce
To the wise Ends requir'd for Nature's use.

**A TABLE of the common Notes and Moveable Feasts
for the Year of our LORD 1759.**

Golden Number	12	Shrove Sunday	Feb. 25
Cycle of the Sun	4	Baiter-day	April 15
Dominical Letter	G	Rogation Sunday	May 20
Epact	1	Ascension-day	May 24
Roman Indiction	7	Whit-sunday	June 3
Sundays after Epiphany	5	Trinity Sunday	June 10
Septuagesima Sund. Feb.	11	Sundays after Trinity	24
Asc-Wednesday, Feb.	28	Advent Sunday	Dec. 2
Number of Days	25	Year of the Johan Period	647

A TABLE of the 12 Signs, 7 Planets, and Aspects.

♈ Aries, Head and Face.	♄ Saturn.
♉ Taurus, Neck and Throat	♃ Jupiter.
♊ Gemini, Arms and Shoulders.	♂ Mars.
♋ Cancer, Breast and Stomach.	☉ Sol. or the Sun
♌ Leo, Heart and Back.	♀ Venus.
♍ Virgo, Bowels and Belly.	☿ Mercury.
♎ Libra, Reins and Loins.	☾ Luna the Moon
♏ Scorpio, Secret and Bladder.	♉ Dragons Head
♐ Sagitarius, Hips and Thighs.	♏ Dragons Tail
♑ Capricorn, Knees and Hams.	☽ Part of Fortune
♒ Aquarius, Legs and Ancles.	♁ Tellus or Earth
♓ Pisces, Feet and Toes.	Venus is an Evening Star from the 12th of January to the 29th of October, from thence a Morning Star, till the Years end.
☿ Conjunction, In one Sign & Degree.	
* Sextile, is 2 Signs or 60 degrees.	
□ Square or Quartile, is 3 Signs or 90d.	
△ Trine, is 4 Signs or 120 degrees.	
♀ Opposition, is 6 Signs or 180 degrees.

P A R T R I D G E, 1759.

A Table of some principal fixed Stars, with the time they Rise, South, and Set, either before or after the Seven Stars; as also their Colour, Magnitude, and Meridian Altitude, by which they may be readily discovered.

Col- our.	Alt.	Magn.	Names of the Stars.	Rise h. m.	South h. m.	Sets h. m.
♂	53	1	Aldebaran or Bulls Eye	1a 34	ca 48	cb 6
h 24	29	1	Left Foot of Orion	4 31	1 31	1 34
24 h	36	2	Middle * in Orions Belt	4 13	1 51	0 35
♂ 8	15	1	Right Should. of Orion	9 23	2 8	0 8
♀ ♂	21	1	Syrius, the great Dog	6 41	3 1	0 48
♂	43	2	Procyon, the little Dog	5 33	3 53	2a 7
h ♀	30	1	Heart of Hydra	8 33	5 41	2 44
24 ♂	51	1	Regulus, Lions Heart	7 29	6 21	5 16
♀	54	1	The Lions Tail, Deneb	8 42	7 54	7 7
♀ ♂	28	1	Virgins Spike	12 46	9 38	6 36
♂ 24	58	1	Arcturus	10 47	10 30	10 12
♂	12	1	Antares the Scorp. H.	17 36	12 39	7 42
h 8	56	2	Bright * of the Vulture	17 38	16 3	9a 27
♀ 8	56	1	Fomelhaut	11 14	19 11	10 37
24 ♀	65	2	Head of Andromeda	10 42	20 19	2 59

THE brightest of the 7 *'s is of the third Magnitude, and hath 61 deg. of Meridian Altitude, and in Colour participates of the ♀ and ♂.

2. The fixed Stars all rise, south, and set, about 4 min sooner every Night than they did the Night before: this considered, the exact time of their Rising, Southing, and Setting, for any intermediate Night not herein noted, may be very easily deduced from these Tables, by Inspection only.

To know the time of the Rising, Southing, and Setting of any Star in this Table, for any Day required, it is but considering how many Hours and Minutes, that Star Rises, Souths or Sets, either before or after the 7 Stars on that Day, and you will have your desire; observing that in this Table, a stands for after, and b for before.

PARTRIDGE, 1759.

PARTRIDGE, 1759.

Some Remarks on the Division of the Heavens,

IN my last I gave my Readers a Compleat Table of Houses constructed according to the true and natural Motions of the Heavens: but the Division of the Heavens generally made use of, is that, which is commonly called the Rational (but improperly) way of Regiomontanus, which is false, and not true to the real and natural Motion of the Heavens; for it is impossible by the dividing the Equator into 12 equal Parts, to divide the Ecliptick so too; for in dividing the Ecliptick we shall divide true Motion, but in dividing the Equator, we divide nothing but Air. And tho' Trigonometry is an excellent Art, yet if your Data are false, your Quæsita must be of the same Nature. But in dividing the Heavens true, the Sun, &c. &c. must have an equal Variance in each House between Cusp and Cusp, *Supra aut infra terram*. Now then, let us examine how this common Division in use, doth agree with this Motion. We will take the longest Day in the Year, when the Sun enters Cancer. The semidiurnal Ark of the ☉ in the beginning of ☉ is $123^{\circ} 11'$ the third Part of that is $41^{\circ} 3'$ nearly. Now let us suppose the ☉ in the very beginning of Cancer on the Cusp of the Ascendant, take $41^{\circ} 3'$ from $123^{\circ} 11'$ and there remains $82^{\circ} 8'$, the Sun's Distance from the tenth, when he comes to the Cusp of the 12th, 9° of ♍ being then on M. C. But by the rational Way (a very improper Term) when the Sun comes to the 12th House, there is 2° of ♍ on the M. C. which makes 6° false on the 12th House. Again, bring the Sun to the eleventh House, and then he is distant from the M. C. $41^{\circ} 3'$ one third of his S. D. Ark, and 22° of 8 is culminant: but by the Rational there is 17° of 8 on the Midheaven, which makes an Error of 5° on the Cusp of the eleventh House. And when the Sun comes to the Cusp of the 10th we differ 3° , on the 11th 2° , on the 12th 2° , on the second 2° , and 3° on the third.

Now let us try the shortest Day also; the Sun in the beginning of Capricorn, his semidiurnal Ark is $56^{\circ} 48'$, the third of which is $18^{\circ} 56'$ which is also the Sun's true Distance

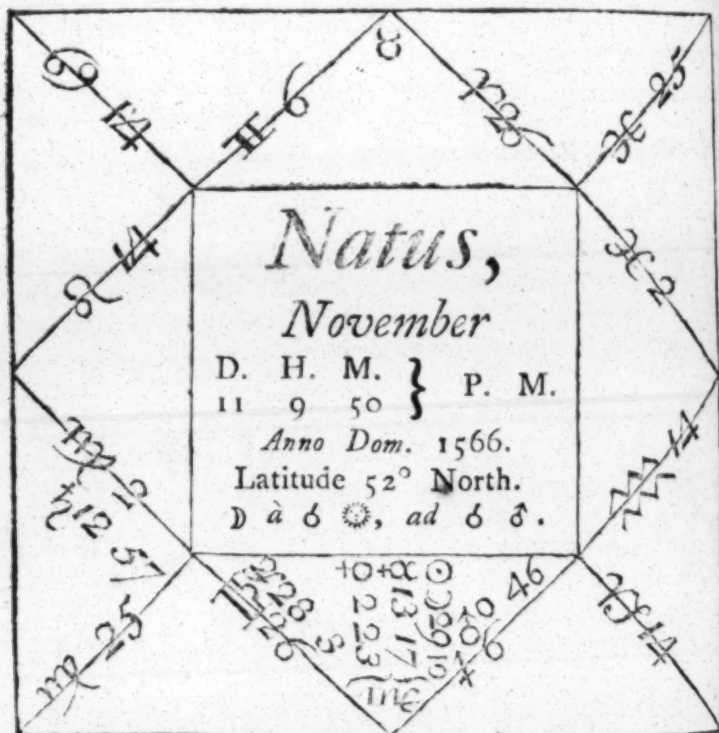

PART RIDGE, 1759.

from the Ascendant, when he comes to the Cusp of the 12th House, 24° of Scorpio is then on the Mid heaven, which in their irrational Way hath 1° of $\frac{1}{2}$, which is 6° false on the Cusp of the 12th House. Again, from $37^{\circ} 52'$, take one third more, and that brings the $\odot$ to the Cusp of the 11th House; at which time we have 12° of $\frac{1}{2}$ on the tenth, and they have 18. So that they are false 5° on the 11th House by true Motion: but besides, when they have 0° of $\frac{1}{2}$ on the 10th, they have but 13° of the same Sign on the 11th House, which should be 18; which by their Rule will make the semidiurnal Ark of 0° of $\frac{1}{2}$, but 39° , which any one may see is false, if they have but Ingenuity enough to examine it. And as for their Trigonometry they are deceived in their Data, for the same Proportions and Numbers serves us likewise. As for Example, to gain the Cusp of the 11th House, 0° of $\frac{1}{2}$ being on the 10th. As Radius to C. S. of $60^{\circ} 00'$ so is the C. T. $23^{\circ} 37'$ to the C. T. $40^{\circ} 56'$. Again, as C. S. $64^{\circ} 29'$ to C. S. of $40^{\circ} 56'$ so is the T. $60^{\circ} 00'$ to the T. of $71^{\circ} 45'$, which gives $18^{\circ} 15'$ of $\frac{1}{2}$ on the Cusp of the 11th House, as before it was by the semidiurnal Ark. Hence it is plain, that the Division of the Heavens by the Equator is not true, and they may as well divide the Ecliptick by the prime Vertical as that, and much about as true as that is. But besides, they may also consider the Poles of the Houses, whether $32^{\circ} 47'$ and $51^{\circ} 32'$ do agree in Proportion to the Division of the semidiurnal Arks; for 32° the Pole of their 11th bear no Proportion to 4° and a half, the Difference between the Poles of the Ascendant and 12th House. And from hence it will appear to any reasonable Person, that their imaginary Division is all false, and not agreeable to the real and natural Motion of the Heavens. I am not the first that hath complained of the Modus Rationalis, as any one may see, if they please to look into *Morinus's Astrologia Gallica*, Lib. 17. which is all about that, but more particular in the 5th Chapter of that Book. I could give you some of his Objections if my room would permit, but having other things to treat of, shall refer you to the Author himself, and in particular to p. 409. And proceed next to give you an Experiment in the genethliacal Part of Astrology, shewing how re-

markable

PARTRIDGE, 1759.

markable the Influence of the Stars was verified by their Positions, at the Birth, (in the Life and Death) of as great and eminent a Person, as any in *England* in his Time. The Scheme follows :

Latitude of the Planets.

♂ 1° 47' North | ♀ 0° 18' South | ♄ 1° 28' North
 ♃ 1° 9' North | ♁ 1° 38' North | ♀ 1° 29' North

THIS is the Geniture of *Robert Devercux* Earl of Essex, who was so famous and beloved in the Reign of *Queen Elizabeth*, that the Commonalty generally adored, as well as admired him; some few Accidents of his Life I shall relate, and the proper Directions that attended them, in an astrological Manner, tho' in a different way from the Astrology studied and practised now a Days, and to shew there is a true Astrology in being. This young Earl after his Father's Death,

PART RIDGE, 1759.

was put under the Tuition of the learned and pious Dr Whit-
gift, and at 16 Years of Age performed his publick Acts as
Master of Arts; he had then by Direction the ♀ ad Δ ♀.

At the Age of 22, he was with much struggling and Con-
tention, made Master of the Horse to the Queen, he had
then the ♀ ad ♂ ♀, and □ of ♂. But with all, the ☉ to
the zodiacal Parallel of ♀, and a little after the ♀ ad * of
♀, which by his wise Observance and Endeavours, procured
him the Queen's Favour, so far that she forgave him a great
Debt which his Father owed her, and made him Knight of
the Garter, and Privy-Counsellor, and that when he was
scarce 23 Years of Age.

At the Age of 26, when the *Popish* Princes of France, en-
tering into a League, that they would have no Protestant
Prince to reign over them, raised an Army against the Earl
of Navarre their lawful Sovereign, who craving aid of the
Queen, she readily consented to assist him with Money and
Men under the Earl of Essex, who gave sufficient Proof of
his Valour upon all Occasions. His Brother *Walter* being
slain before the Walls of *Roan*: upon which the Earl chal-
lenged *Villars*, the Governor of the City to a single Combat,
which he durst not accept. The Earl a while after returned
to England; being informed by his Friends, that many envi-
ous Courtiers were contriving to throw him out of the Queen's
Favour; he had the ♀ ad * ♂ and ♀. And the ☉ and
M. C. to the □ of ♀.

In 1595 in the 28th Year of his Age, he and *Howard*,
Joint Admirals, sailing to *Cadix* in a short Time took Town
and Castle, and having ransacked the Island, demolished the
Forts, burnt most of the Houses, filled their Ships with Plun-
der, and burnt several *Spanish* Vessels, the Fleet returned
victoriously Home, the King of *Spain*, having lost in that
Expedition 13 of his best Men of War, 40 Merchant Ships,
100 Cannon, with other great Stores of Ammunition and
Naval Provisions, he had the ♀ by Direction to the ♂ of ♀.
&c. And likewise he was made Admiral of a Fleet sent
against the Islands of the Azores, belonging to the *Spaniards*,
where the Island of *Graciosa* and *Ferrol* yielded to him, and
returning would be sole Favourite, but had great Contentions
with

PARTRIDGE, 1759.

with *Rawleigh, Cecil, and Howard*, which last was made Earl of *Nottingham*, he had his M. C. ad 8 ☉. and the ♀ ad 8 ♀, and ☉.

When he was 33 Years of Age he was made Lord Deputy of *Ireland*, and was empowered with so ample a Commission, as was thought to be contrived by his Enemies on Purpose, by enflaming his Ambition to procure his Ruin, which Scheme proved effectual, for they brought him to his Death, for he was beheaded on *Feb. 23th 1601*, in the 34th Year current of his Age, which was two Years before the Year his Father desired him not to forget, as the utmost Term of Life: he had then the ♀ ad ☿ ♄. the ☉ ad Z. Par. ♀, and the ♀ ad Par. ♀. In his last Revolution he had the ♀ in 8 to his radical ☉ ♄ and ♀, and then applying to a ☿ ♄, and 8 ♀, very violent Positions. The Arguments of a violent Death in the Nativity, are the Luminaries in 6 and Par. ♀ in violent Signs, &c. These are some of the astrological Reasons I assign for this great Native's, Honour, Preferment, and last of all his sudden and much lamented Death. For this noble Earl was snatched out of the Arms of his Sovereign, and torn from the Heart of the People, who doted on him. And by the subtilty of his Enemies brought to an untimely Death in the sight of them both, who were quiet Spectators of his Ruin at the Time abovementioned.

Judicium, Astrologicum, pro Anno 1759. Or Observations upon the four Quarters of the Year.

Of the Winter Quarter,

WHICH begins on *Thursday* the 21st of *December 1758*, at 55 Minutes past 7 at Night apparent Time, when 14 Degrees of ☉ ascends, and 26 Degrees of ☿ culminates. *Mars* Lord of the 10th in Exaltation in 6 with 8, and both behold the *Moon* with a friendly Δ the *Sun* Lord of the Ascendant, is intercepted by ♄ and ♀, and all within the Orb of *Saturn's* ✱; these and some other preceding Configurations should be inclinable to judge, will incline Mens Minds to thoughts of Peace, and amicable Treaties, in all or most Nations in *Europe*, and indeed I cannot but think some Overtures and Treaties of Peace will be brought near

PARTRIDGE, 1759.

to Perfection in this Quarter, but I doubt not finally ratified, or to be long Continuance, but only prove like a Calm that precedes a Storm. If we look farther into the Records of Futurity, we shall find within the Limits of this Quarter, some Aspects in the celestial Wanderers, and Positions very different from the former, being of a malefic Influence, and that will be attended with Effects suitable to their Natures, and bear the principal Sway in this Year's Transactions.

*Venus and Jove would fain proclaim the Day,
Of Jubilee, and Europe's happy Peace;
Saturn and angry Mars boldly say nay,
Revenge and Int'rest, best their Humours please.
From thence tumultuous Actions we desery.
(Their Rays do tend unto Extremity).*

Of the Spring Quarter,

WHICH begins this Year on the 20th Day of March at 21 Minutes and a half past 9 at Night, when 18 Degrees of Ω is culminant, 15 Degrees of $\cap$ is horoscopical, fixed Signs possess the prime Angles, the Planets are sub Terra, &c. The γ is in the 2d House, Υ in the 3d, δ in the 4th, ζ and the $\odot$ in the 5th, and φ in the 6th. The Aspects at this Ingress are Υ is in $\times$ to δ and ζ , in $\square$ to φ . The γ is $\square$ to δ and ζ , in Δ to φ . But the great Cardan adviseth to consider the Place of the New Moon preceding the annual Revolution, to know in what Place of Heaven it is from the Ascendant, for great Matters will come to pass according to the Nature of that House. His Words are, *Conjunctiones locum revolutionem precedentis, quo in loco ab ascendente aut revolutionis anno considero, nam magna evenient juxta domus naturam.* p. 2. 187.

Therefore upon viewing the new Moon Feb. 26th, I find it to be celebrated in 9 Degrees of $\times$, near the Cusp of the Ascendant, within 3 Degrees of the δ of δ and ζ , and in the very Degree of δ at the Ingress. If Credit is to be given to the preventional new Moon of the Sun's Ingress in Aries, as the best astronomical Authors, both ancient and modern, assure us there is: then some more than ordinary martial and saturnine Accidents will this Year appear in the World; as Breach of Leagues and Treaties among Princes, high Disputes and Controversies among Rulers and Men, and much Hypocrisy, Fraud, and Dissention, among the Commonalty; as also great Mischicks arising from a Pretence of Friendship and religious Sanctity. That desirable Time is not now to be expected, when Peace is to be established, and when Truth and Righteousness embrace each other. There is some Work of another Nature first to be done. Men's Passions are now in too great a Ferment, their Passions run high, and will easily be reduced to Reason. The $\times$ of δ and Υ intimates, that in order to check the present perverse Disposition of Mankind, some worthy Men,

PARTRIDGE, 1759.

Men, especially some eminent ecclesiastical Persons, will interpose their most Endeavours, to mitigate Mens Passions, and allay the Heats and Animosities of the Times, and to moderate and reconcile contending Parties; and such a laudable Interposition may for a while have it's Effect, and seemingly lay the evil Genii of the Times. But alas! the Calm will be of no long Continuance; the more potent and malevolent Configuration will break the desired Tranquillity, by exciting Mankind to rash and furious Actions, as Frauds, Quarrels, Combinations and Bloodshed; as all in some Places a malignant disordered Air, and unusual Sickneses with great Mortality. The Places subject to these malevolent Rays, are those under $\times$ and w , some of which Places are *Portugal, Normandy, France and Silesia, Alexandria, Compostella, Paris, Lyons, Brazil, Jerusalem* &c. &c.

*What Change is now at Hand? nay what care we?
We suffer not by the Catastrophe.
If Virgo is the Horoscope of Gaul,
Saturn agrees with Mars to work their Thrall.*

THE Summer Quarter begins on *Thursday June* the 20th, at 10 Minutes past 8 in the Afternoon. A. T.

THE Autumnal Quarter, begins *September* the 23d Day, at 5 Minutes past 9 in the Morning. A. T.

Of the Eclipses in 1759.

THERE will be only three Eclipses this Year, and but one visible and that is of the *Moon*, the other two are of the *Sun* invisible they happen in the following Order and Time.

The first is of the *Moon*, the Time and Quantity of Appearance, is inhibited by the following Calculation.

	D.	H.	M.	
The Eclipse begins <i>January</i>	13	6	38	} <i>Moon eclipsed</i> } <i>Morning appar</i> } <i>Time London.</i>
The middle of the Eclipse		7	59	
The Ecliptick Opposition		8	7	
The end of the Eclipse		9	19	
Digits eclipsed 21° 9'				

The second Eclipse is of the *Sun* on Midsummer Day, the 24th of *June* at 5 in the Afternoon, invisible.

The third and last is also of the *Sun* invisible, it happens on the 17th Day of *December* at 2 Hours 30 Minutes, Afternoon.
